

# SmartPlay AI — Insights Report

Generated 2025-09-07 (UTC)

**SmartPlay AI** uses data-driven analysis to highlight hot and cold number trends and build balanced ticket sets. This sample shows the look and feel of our weekly reports for *Jamaica Lotto*, *Super Lotto*, and *Powerball*.

Game	Suggested Hot Numbers	Suggested Cold/Overdue	Recommended Strategy
Jamaica Lotto (6/38 + Bonus)	8, 12, 13, 21, 30, 33, 38	1, 2, 4, 5, 6, 9, 10, 16, 19, 37	Blend (≥2 hot, ≥2 cold)
Super Lotto (5/35 + SB 1–10)	3, 14, 18, 24, 28	5, 9, 19, 27, 33	Cold emphasis + SB spread
Powerball (5/69 + PB 1–26)	11, 22, 33, 44, 55	9, 16, 37, 48	Blend whites, random PB

## Methodology (Overview)

We compute recency-weighted frequencies to classify numbers into **hot** (recently common), **cold/overdue** (rare lately), and **neutral**. Ticket sets are generated using controlled randomness with constraints (e.g., minimum hot/cold counts) and optional clustering (e.g., overdue cluster 2–4–5–37).
